Zen Meditation

*Cultural study on East Asian Studies Princeton High School*

This lesson was created in response to a visit to the Myooshin-ji temple and practice of Zen meditation during 2016 FPRI Educators Workshop in Japan.

**Lesson Activity Overview**

Because our school has such high expectations, in recent years we have seen a significant increase of over worked, depressed and mentally unstable students. Quite a few of them can not continue attending school and become “home instruction” students. In order to deal with this issue, our school district added a “no homework weekend” policy to reduce students’ workloads and stress levels. While visiting Myooshin-ji in Kyoto, I learned of Zen Buddhism and Zen meditation. These practices helped greatly reduce my stress of traveling and helped recenter myself for the next part of my journey. Through this lesson, students will learn about Zen Buddhism and Zen meditation and will learn how to do so. If the lesson goes well, I think this would be a great activity to do during homeroom so everyone can prepare themselves for the upcoming trials of the day.

**Lesson Objectives**

Students will read primary and secondary sources about Zen Buddhism and Zen meditation in order to understand the history; differences in China, Korea, and Japan, and the benefits of meditation in various countries, people, and conditions.

Students will then explore and practice the method of Zen Meditation, especially breathing exercises.

Lastly, students will practice the 5-minute meditation every day during the lesson for 1 marking period and discuss if there are any changes physically and mentally.

**Number of Class Periods**

This activity is intended to be done through one marking period but if it brings positive difference I would like to continue the 5 minutes’ meditation.

2 class periods (based on a 47-minute class).

After introduction of Zen, 5 minutes in every class.

**Grade Level**
